

The New Course will be closed on Tuesday January 22, 2019. We will be applying herbicides on Monday just outside the temporary greens that will eliminate the grass and weeds. The herbicides have a tendency to track from one spot to another after spraying. Keeping mowers and foot traffic off for a complete day (Tuesday) after spraying ensures us of not doing damage to the temporary greens. Please realize this will help with our weed control and will not damage what we have in place.
