RE: Water/Sewage

Water/Sewage Debacle

A few weeks ago, we sent an email out stating that your water and sewer rates would be lowered to the current rates as approved in the PUC final Order. That Order was issued and filed on December 20, 2019. Through our attorneys, we were informed that DDU was installing the new rates as of January 1.

The question we are sure you are wanting to ask is, what do we do now? First, we are not going to let this stand. Your WBRP Committee through our attorneys has filed motions to intervene in the sale of DDU to Midway Water Utilities. The reason is to protect the interest of you the Ratepayer. At the moment, DDU owes you as a Ratepayer group upwards of \$600,000. Secondly, we are filing a complaint with the PUC on Monday concerning the lack of integrity of DDU to install these new rates on your behalf as is required by the State of Texas.

Sincerely,

WBRP Committee
