FROM: White Bluff Utilities

RE: Water Supply and Irrigation Systems

The White Bluff Utilities Manager has asked for your cooperation to please turn off your irrigation systems for the next few days. We have adequate water levels in the tanks to supply sufficient potable water. We are afraid that when the residents' irrigation systems come on in the morning it will be too much of a strain on the system. We are working very hard to get the system back to full capacity and ask for your cooperation in making sure that all home owners have sufficient water in the coming days.

We appreciate your help in this matter.

Thank you,

Todd Dilworth

White Bluff Utilities Manager
