RE: Resort Holding Ponds

Your Board has instructed Double Diamond maintenance staff and corporate management to immediately fill the holding ponds with water purchased by the POA from the Brazos River Authority. Double Diamond has allowed the water levels to decrease to dangerously low levels, which will damage the ecosystem if appropriate action is not taken. The ponds are homes to countless fish and other animals and serve as a source of water for our wildlife.

We hope this positive action on the part of the POA will be an indication to Double Diamond that the POA is making yet another effort to open the door to resolution.
