RE: Save The Wildlife!

As a part of Double Diamond's closure of all hospitality venues at White Bluff, the water pumps were locked up and the electricity turned off. The result of this action is that the POA cannot adequately maintain the common areas, which include the ponds and lakes throughout the resort in the near term. These small bodies of water are vital to our wildlife, both those that call the water their home as well as the countless number of animals that access the areas for drinking water. Many of the ponds and lakes are getting dangerously low. Appeals to Double Diamond to unlock the water pumps have been met with a negative response.

Please know that the POA takes its responsibilities seriously, inclusive of protecting our wildlife. We are at a loss right now as to how to deal with this immediate water problem other than to ask for your individual help. If possible, please arrange to have some fresh liquid refreshment (water) available at your property for the wildlife. We also need to hear your voice concerning a long-term resolution to this problem. The best way you can express your support for sustaining our wildlife is to respond by supporting the POA through granting us your proxy.

If you granted us your proxy previously, it was only for a period of nine months. Please re-new your support now.

If you granted your proxy to someone else but now have the desire to support the POA in its efforts to save the wildlife and also reach resolution, we ask that you express your support now.

If you have not granted your proxy, the POA needs your help to fight the current battle for our wildlife and also bring resolution to the problems at our resort.

New proxies are valid for eleven (11) months and may be revoked at any time. Go to [www.whitebluffpoa.com](http://www.whitebluffpoa.com), click on "PROXY" and follow the instructions.
