TO: White Bluff Property Owners  
FROM: Your Board of Directors  
RE: Wild Hogs

The past two nights the New Course has suffered extensive damage from wild hogs. The damage last night on hole #5 at the New Course will require the purchase and installation of four pallets of sod. We will be taking the necessary action to do what we can to mitigate this potentially devastating situation.

It is readily apparent that numerous property owners are contributing to this problem by feeding the numerous deer on property. There is absolutely no doubt that deer corn attracts the hogs. **We are asking that all property owners CEASE feeding deer immediately.** At this time it is voluntary; however, if we find that property owners are not complying with this request the Board will address making the feeding of deer prohibited and subject to a substantial fine.
